**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to a method for writing data to a flash memory including allocating step, classified in class 711, subclass 170.
  - II. Claims 16-17, drawn to a method for reading data from a flash memory including searching a log pointer table step, classified in class 711, subclass 202.
  - III. Claims 18-38, drawn to a method for managing a flash memory including a data block and a log block for writing data including step for updating the data block when the error occurs, classified in class 714, subclass 6.
  
2. The inventions are distinct, each from the other because of the following reasons:

Inventions groups I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in groups I-III has separated utility because each of the invention claims different flash memory operations as stated in the previous paragraph. Each of the claimed invention groups can be used separately in a flash memory system. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Peter McKenna (Reg. No. 38,551) on 3/30/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hong C Kim whose telephone number is 703-305-3835. The examiner can normally be reached on M-F 9:00 to 6:00.
